

A LITTLE HISTORY...

In 1977, our founder experienced the need for a new service. At this time, severely sunken and raised concrete was torn out and re-poured. Randall Greene coined the phrase "Concrete Leveling" and developed tools and techniques that allow us to reposition concrete slabs and save residential and commercial customers time and money.

For the past three decades, the Greene Company has served over 60,000 customers in Northeastern Ohio. Our customers realize that with time and experience comes quality and integrity. Since the Greene Company is truly the original Concrete Leveling company, we possess skills and techniques that smaller, less experienced companies lack.

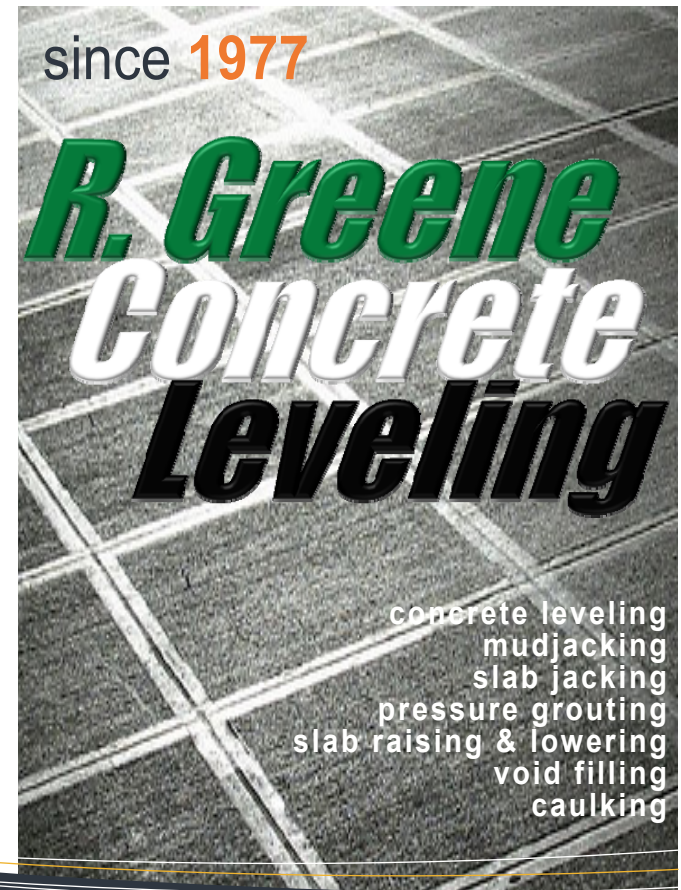

It is our commitment to doing things the right way, the first time, that allows Greene Concrete Leveling to save customers money while providing an unrivaled Five Year Warrantee. Exceptional customer satisfaction and a superior reputation has allowed the Greene Company to grow each year since 1977. Over the years, we have developed synergetic relationships with many municipalities in the Cleveland area, and are now reaching out to your city in hopes of also serving you.

APPLICATIONS OF CONCRETE LEVELING:

- Public Sidewalks
- Streets
- Sandstone
- Bridge Abutments

To Whom it May Concern,

This brochure contains information about the concrete repositioning services that our company has provided in Northeast Ohio for the past 30 years. We pride ourselves on the guaranteed quality of our work and believe that your city may benefit from our alternatives to tearing out and replacing sunken streets, sidewalks, and other concrete surfaces.

Thank you very much for your time.

Sincerely,
 Randall Greene
 Founder/President

Stop wasting perfectly good concrete.

CONCRETE LEVELING SAVES MONEY, TIME, & NATURAL RESOURCES

Founded in 1977, R. Greene Concrete Leveling Co., Inc. serves nine counties in Northeast Ohio.

As the most experienced leveler in the industry, the Greene Company possesses

an impeccable reputation of quality and integrity. We

believe your municipality needs

our services.

Our corporation, R. Greene Concrete Leveling Co., is a family-owned business and equal opportunity employer. Over the past three decades, demand for our services has grown tremendously, resulting in consistent growth and expansion each season. We have had the opportunity to contract with several cities in Northeast Ohio, leveling entire streets, public sidewalks, and other concrete surfaces at community and government facilities. Our processes saves customers 50-80% off the cost of replacing sunken or raised concrete and comes with an unmatched Five Year Warrantee.

the quality service your city needs

THE PROCESS

Concrete leveling is a process that consists of both manual leveling and mudjacking. Manual leveling is a service exclusive to R. Greene Concrete Leveling and is used to level stamped concrete, sandstone, and to lower concrete surfaces that have heaved upward. Many situations require both manual leveling and mudjacking procedures.

Mudjacking (aka Slab Jacking or Pressure Grouting) involves drilling 1" diameter holes in the low areas of concrete surfaces and using hydraulic buggy pumps to force a dense grout material through the holes and under the block. This fills any voids and uses pressure to literally pump up the concrete to its original position.

UNLIMITED SAVINGS

Through our work for residents, businesses, and cities in the Cleveland area, we estimate that approximately 90% of the concrete that is torn out and repoured could have been releveled. With the price of cement and other raw materials on the rise, this results in wasting millions of dollars each year. Our work is usually finished in one day is ready for use immediately.

We firmly believe that this is an opportunity to create a mutually beneficial relationship between the original concrete levelers and the cities we live and work within. We would appreciate the opportunity to meet with someone in your city offices to discuss how we can work together.

THE GREENE ADVANTAGE

- RAISING AND LOWERING CONCRETE
- UNMATCHED WARRANTEE
- 32 YEARS OF SUCCESS IN BUSINESS
- IMMACULATE REPUTATION
- ENVIRONMENTALLY FRIENDLY
- CONSERVES NATURAL RESOURCES

Founder Randall A. Greene

WHY RELEVEL OUR CONCRETE?

More than ever, it is important for Americans to look for ways to conserve funds and natural resources. Concrete leveling provides a means for eliminating trips, voids, poor drainage, puddling, and other hazards quickly and efficiently.
